S. No.	Queries	Clarification
(i)	<p>It is most humbly submitted that under pre-qualification, the requirement of minimum turnover of Rs. 8.50 Crores and successful executed any loading work of value of Rs. 1.70 Crore in its own name has been required.</p> <p>In this regard, it is submitted that the Entity having Mining activities is also involved for loading of the mined minerals thereby the total turnover for mining activities inter alia includes the execution of loading work and which may be quantified at about 3% of total mining turnover inasmuch as the loading of the mined material includes in the mining activities itself.</p> <p>Therefore, the requirement mentioned regarding separately executing the loading work would restrict the competitive Bids and it would be against the public interest and loss to the public money as the said condition is against the mass participation of competent and eligible Bidders having vast experience in the field of mining and loading of mined minerals inasmuch as the said activity is part of the mining activity.</p> <p>It is, therefore, humbly requested that the said requirement may kindly be revisited and to allow the mass participation and for obtaining competitive Bids from competent and eligible Bidders, specific percentage from the turnover of mining activities may kindly be considered to be loading work value and the modification may kindly be made accordingly.</p>	Tender Condition will prevail.
(ii)	<p>It is further submitted that the total value of work appears to be not more than Rs. 2 Crores per year, whereas the EMD/Bid Security has been prescribed to be 34.00 lacs, which should be 2% of the value of the work as per provisions of Rajasthan Transparency in Public Procurement Rules, 2013. Therefore, it appears that the value of work has been considered to be Rs. 17 Crores, which is not only abnormal but also more than 8 (eight) times of actual value of the work. Accordingly, the requirement of turnover is appears to be more than 400% of the estimated value of the work and loading experience is about 100% of the estimated value of the work.</p> <p>The abnormal turnover, experience and requirement of EMD considering the value of the work to be more than 8 (eight) times of the actual estimated</p>	Tender Condition will prevail.

	<p>value would appear to have been imposed for restrictions of mass participation of Bidders, which would restrict the competitive Bidding and would be beneficial for some of the interested persons. Therefore, the requirement of requirement of turnover, experience for loading work and EMD may kindly be prescribed as per actual value of the work to be awarded so that maximum participation in the bidding process may be possible and the Company (RSMML) would receive competitive Bids, which would be in public interest.</p>
