Sub: Six monthly compliance report of Environmental Clearance for Kasnau-Matasukh Lignite Mines, Distt. Nagaur (Rajasthan) for the period of October- 2024 to March- 2025.

Dear Sir,

In compliance of conditions stipulated in the Environmental Clearance vide letter No. J 11015/21/99/IA.II(M) dated 19th July, 2000 & Project Code- Raj-165/243/2000 and Revalidation of Environmental Clearance dated 29.07.2022 vide EC Identification No.EC22A042RJ141117; please find enclosed herewith half yearly report for the period of October- 2024 to March- 2025, in respect of Kasnau-Matasukh Lignite Mines, Distt. Nagaur (Rajasthan).

Thanking you,

Yours faithfully,

(Arun Singh)

Compliance Report of conditions stipulated in Environmental Clearance

Name of the Project: Kasnau-Matasukh Lignite Project, District Nagaur

Project Code– Thermal & Coal (Raj-165/243/2000)

Environmental Clearance letter no. J110015/21/99/-IA.II(M) Dated: 19.07.2000

Revalidation of Environmental Clearance dated 29.07.2022

EC Identification No. EC22A042RJ141117

Period of Compliance Report: October 2024 to March 2025

A.	Specific Conditions	
S. No.	Condition	Compliance
i.	The entire water requirement (domestic, industrial as well as green belt development should be met only from the safe category zone i.e. S2 of Jayal Block District, Nagaur.	The entire water requirement (domestic, industrial as well as green belt development) is met with only from Nagaur Lift Canal is utilized for above purposes.
ii.	The project authorities should develop an alternate Charagah land for the villages in lieu of the grazing land to be acquired for the project on priority, in consultation with the State Government at their cost.	Alternate charagah land for villages, in lieu of the grazing land has been acquired & handed over to the Collector, Nagaur. A total of 97.92 Hect. Alternate charagah land has been provided.
iii.	Topsoil should be stacked properly with adequate measures at earmarked site (S). It should be used for reclamation and rehabilitation of mined out areas.	Topsoil is being stacked separately at earmarked site and is being used for reclamation and rehabilitation of the mined out area & surface O.B. dumps.
iv.	The flood prone areas should be kept under strict surveillance. Pumps of sufficient capacity and head should be installed at vulnerable locations along with adequate capacity sumps.	For strict surveillance, pumps of sufficient capacity are available with the company at mine site.
v.	Mining and back – filling in both the blocks (Matasukh and Kasnau) should be carried out concurrently.	Mining and backfilling is being carried out concurrently in Matasukh pit.
vi.	OB Dump should be designed properly keeping in view the characteristics of OB and the angle of slope. The overall slope of the OB dumps should be	OB dumps are designed properly keeping in view the characteristics of OB and the angle of slope. Overall slope of OB dumps does not exceed 28°. 	exceeding 28°.	
vii.	Check dams and siltation ponds of appropriate size should be constructed to arrest silt and sediment flows from OB and mineral dumps. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly de silted and maintained properly.	<p>After three years of mining operation the back filling is concurrently back filling in the mining pit. At present there is no OB active dump in the mining area. As per the instruction of Directorate of Mines & Geology we are dumping some variegated clay separately (as per mineral conservation rules). OB dumps in the mining area is about 18 years old and are stable. Water collected from the siltation ponds is utilized for spraying on roads, green belt development etc. and drains are regularly maintained properly.</p> <p>After three years of mining operation, the back filling is concurrently done in the Matasukh pit. At present there is only one active OB dump for Kasnau pit in the mining area.</p> <p>As per the instruction of Directorate of Mines & Geology we are dumping some variegated clay separately (as per mineral conservation rules). Matasukh OB dumps in the mining area is about 20 years old and are stable. Water collected from the siltation ponds is utilized for spraying on roads, green belt development etc. and drains are regularly maintained properly.</p>
viii.	Geo-technical study for slope stability should be carried out and report submitted to the Ministry.	Earlier Geo-technical studies for slope stability were carried out by Prof.(Retd.) Dr. D.M. Surana of JNV University, Jodhpur. Reports have already been submitted. Recently, in September-2021 Geo-technical study for slope stability has also been carried out by CSIR-CIMFR, Dhanbad.
ix.	Adequate capacity de-fluorination plant should be installed to meet drinking water requirement of the workers and the township (700 families).	Water supplied from Nagaur Lift Canal is being utilized for drinking purposes.
x.	The project site and Nagaur-Didwana highway should be connected by a metallic approach road for transportation of lignite. Both sides of the road should be properly planted and maintained.	Metallic road from project site to the Nagaur-Didwana highway has been completed and plantation work on both sides of the road is partially completed. Remaining plantation is in progress.

xi.	Wastewater from domestic and industrial effluent should be suitably treated and reused for industrial purpose. Township should be provided with sewerage treatment plant.	The wastewater from work shop, whenever generated, will be suitably treated and used for plantation /dust suppression purposes. There is no residential colony/township at mines site.
xii.	While the mining operation is on, regular monitoring of ground water level and quality should be carried out by establishing a new work of existing wells and constructing new Peizometers. The interval of monitoring should be found times a year – pre monsoon (April / May), monsoon (August), post monsoon (November) and winter (January). MOEF and CGWB.	Monitoring of ground water level and quality are being carried out regularly by establishing a network of existing wells and 2 piezometers.
xiii.	A green belt of 200m. width covering an area of 261 Ha. By planting the native species should be raised around the lease area, township, road etc. in consultation with the local DFO/CAZRI/Agricultural University. A detailed greenbelt development plan indicating year-wise activities and availability of resources should be submitted to MOEF within three months.	Green belt development has been taken up in consultation with local DFO, etc. by planting local and suitable species of plants. Total 83,839 nos. plants developed in the various (dumps, office, camp site) & along the road in 124.35 Ha. area.
xiv.	For management of lignite stockpile, ground should be provided to prevent any leaching and its impact on the ground water.	A suitable ground for stockpiling of lignite has been provided. Water level at this place is 50-75 meters from surface. Impervious clay zones are stopping leaching of such water to ground water. For preparation of ground for Lignite Stock yard, impermeable layers of clay are also spreading to stopping leaching of such water to ground water.
xv.	A detailed mine decommissioning plan should be submitted to MOEF, 5 years in advance.	Agreed
xvi.	Digital processing of the entire lease area using remote sensing technique should be done regularly once in three years for monitoring land use pattern and report submitted to MOEF and its regional office.	Digital processing of the entire lease area using remote sensing technique is being undertaken for monitoring land use pattern. Last report was submitted to MOEF & its Regional Office on

		15.07.2021.
B	General Conditions	
S.No	Condition	Compliance
i.	No change in mining technology and scope of working should be made without prior approval of the Ministry of Environment & Forest.	No change has been carried out in mining technology and scope of working. During the year 2004, due to heavy inrush of water in the Matasukh & Kasnau pit, De-pressurization activity as per scheme desired by CMPDIL has been included for safe mining.
ii.	No change in the calendar plan including excavation, quantum of mineral coal and waste should be made.	No change in calendar plan has been made. But due to sudden inrush of huge quantities of ground water, calendar plan had to be changed for lignite production since March, 2004. Production of lignite could be started only in November, 2005 after depressurization of underground water through installation of 16 nos. of tubewells in Matasukh pit along with 2 Piezometers for monitoring ground water level.
iii.	Spontaneous heating and fire in lignite dumps should be controlled by proper stacking. Heating spots and fire sites should be watered regularly / continuously, as necessary.	No incidence of spontaneous fire has been observed till date.
iv.	Five ambient air quality-monitoring stations should be established in the core zone as well as the buffer zone for RPM, SPM SO ₂ NOX and CO monitoring. Locations of the stations should be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets in consultations with the State Pollution Control Board.	Ambient air monitoring stations have been established for PM ₁₀ , PM _{2.5} , SO ₂ , NO _x in consultation with RSPCB. Details of five Air quality-monitoring stations are as under:- 1. Mines Manager Office 2. Near OB Development Area 3. Near Lignite production faces 4. Canteen 5. Contractor's Camp
v.	Data on ambient air quality should be regularly submitted to the ministry including its Regional Office at	Six (6) monthly ambient air quality (PM ₁₀ , PM _{2.5} , SO ₂ , NO _x) reports being sent regularly to MOEF, Integrated Regional Office at

	Lucknow and the State Pollution Control Board / Central Pollution Control Board once in six months.	Jaipur and RSPCB.
vi.	Fugitive dust emissions from all the sources should be controlled regularly monitored and data recorded properly. Water spraying arrangement on haul roads, wagon loading, dump, truck (loading & unloading) should be provided and properly maintained.	Regular water spraying is carried out on haulage roads, loading & unloading points to protect fugitive dust emissions. Proper monitoring & data recording are being undertaken on six monthly basis.
vii.	Adequate measures should be taken for control of noise levels below 85dB in the work environment. Workers engaged in blasting and drilling operations, operation of the HEMM should be provided with earplugs / muffs.	Measures are being taken for controlling & managing noise levels below 85 dBA. Ear plugs & muffs are being provided to all HEMM operators, supervisors etc.
viii.	Industrial waste water (workshop and waste water from the mine) should be properly collected, related so as to confirm to the standards prescribed under GSR 422(E) dated: 19 th May, 1993 and 31 st December, 1993 or as amended from time to time. Oil and grease trap should be installed before discharge of workshop effluents into the pond.	There is no industrial waste water generated during the mining. Only washing of machinery, vehicles and shovels etc. some generated waste water are being properly collected as per the standard prescribed rules.
ix.	Acid mine water, if any, has to be treated and disposed off after conforming to the standard prescribed by the competent authority.	Mine water is not acidic in nature. Hence not applicable.
x.	Environmental laboratory should be established with the adequate number and type of pollution monitoring and analysis equipment in consultation with the State Pollution Control Board.	Environmental monitoring laboratory has been established at Central Lab, Jodhpur.

EC Identification No.EC22A042RJ141117

Revalidation of Environmental Clearance dated 29.07.2022

Period of Compliance Report: October 2024 to March 2025

S.No.	Description of Additional Specific Condition	Compliance/Remark/Status
i	PP to obtain the CTO for 1 MTPA capacity immediately after grant of revalidation of EC. Any violation to provision of Water and Air Act, if exist, SPCB liable to take action accordingly.	CTO has been obtained from the RSPCB, Rajasthan.
ii	PP shall comply with all the EC condition whichever is non- complied or partially complied as per the certified compliance report, like green belt, dedicated environment cell, etc. The same shall be reported to IRO, MoEF&CC within 3 months with action plan in time bound manner.	1. Green belt development: proposal for the same is prepared & is in pipeline. 2. Dedicated environmental cell has been setup.
iii	PP shall focus on tree plantation along the Nagaur Didwana highway as per the Condition no. 10 and 13 of EC. A detailed action plan with budgetary provision should be submitted within 3 months to IRO. Areal images in this regard needs to be submitted in six monthly reports to IRO.	A detailed action plan for tree plantation along the connecting road to Nagaur Didwana highway is already submitted to IRO.
iv	PP to accomplish the recruitment of a full-fledged qualified manpower with Environmental Engineer/Env. Science degree background in Environment Management Cell etc within six months and same shall be reported to IRO, MoEF&CC.	Shall be complied. Appointment of Environmental Engineer & other staff is in progress.
v	PP to submit the separate EMP budget other CSR activity. Separate budget would also require to address the public hearing concerns. An action plan shall be drawn with local gram panchayat within 3 months from date of issue of letter. A dedicated budget shall be earmarked to meet the public concerns and action be submitted within 6 months to IRO,	Is being complied

	MoEF&CC.	
vi	PP to monitor the water quality of the ground water and surface water body located within the core zone and 5 km radius from the periphery of the mine boundary as per procedure laid down by CPCB.	Is being complied
vii	PP to install 1 more continuous ambient air quality monitoring stations at suitable locations preferably village side with consultation of SPCB. The real time data so generated shall be uploaded on company website and linked it with website of CPCB & SPCB. In addition, data should also be displayed digitally at entry and exit gate of mine lease area for public display.	Shall be complied. Procurement of CAAQMS is in progress.
viii	PP shall develop 2 water harvesting pond near the villages of suitable area as suggested by EAC in consultation with Gram Panchayat within 1 year.	2 nos. of water harvesting structures at the Mines Office has been constructed.
ix	PP shall deploy atleast 10 number of fog canons with 40 mts throw for mitigation of fugitive dust during mining operations within six months.	Shall be complied
x	PP shall comply to its letter Refer no. RSMML/SBU(L)/VDB/F.5/KM/EC/2018/2022-23/25 dated 4th April, 2022 submitted the estimated allocated budgetary expenditure for EMP to be spent in next 5 years which includes Rs. 5.22 crores for plantation, Rs. 0.28 cr for rooftop rain water harvesting structures in 15 school buildings, Rs. 0.88 cr (proposed rejuvenation of 10 existing natural ponds within the buffer zone), Rs. 1.50 cr (for air, water, noise & soil monitoring), Rs. 8.29 crore (for water sprinkling for dust suppression) and Rs. 0.25 cr (occupational health & safety measures).	15 nos. of Water recharge Structures have been constructed in and around the mine in past. Recently, rooftop rain water harvesting structures in 15 nos. of school buildings and rejuvenation of 10 existing natural ponds within the buffer zone are also constructed. Further, 2 nos. of rooftop rain water harvesting structures are also constructed at Mines Office building.
xi	PP to maintain the topped haul road properly to minimized the dust emission. PP to also develop pucca roads by seeking consent from the panchayat with widening of roads especially roads inter linking the villages within the study area of 10 km radius buffer zone.	We have already maintained the topped haul road properly to minimize the dust emission. Further we have undertaken the work of developing pucca roads under CSR, after seeking consent from the panchayat. 		buffer zone.
xii	PP to plant additional 100,000 plants with three tier plantation along the haul Roads, if not completed, and identified areas with consent to the gram panchayat within one year and plant for remaining within 1 year for their proper growth.	Additional 100,000 plants will be planted with three tier plantation along the haul roads, other service road & backfilled area through our mining contractor.
xiii	PP to install solar lights along the road used for transportation of minerals to avoid the accidents at night and also seek its maintenance. PP is asked to also identify the rural areas for installation of solar light with its maintenance within the study area of 10 km radius buffer zone within one year	Shall be complied
xiv	Proponent shall appoint an Occupational Health Specialist for Regular and Periodical medical examination of the workers engaged in the Project; also, Occupational health check-ups for workers having some ailments like BP, diabetes, habitual smoking, etc. shall be undertaken once in six months and necessary remedial/preventive measures taken accordingly. The Recommendations of National Institute for ensuring good occupational environment for mine workers shall be implemented. The prevention measure for burns, malaria and provision of anti-snake venom including all other paramedical safeguards may be ensured before initiating the mining activities.	Shall be complied
xv	Persons of nearby villages shall be given training on livelihood and skill development to make them employable with its proper records.	Shall be complied
xvi	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and	Is being complied
