Detailed Notice Inviting Expressions of Interest (DEOI)

Rajasthan State Mines and Minerals Limited (RSMML) is one of the leading and progressive Undertaking of the Government of Rajasthan. It occupies a place of pride in production and marketing of non-metallic minerals of India. RSMML is multi mineral and multi-location enterprise engaged in mining of Rock Phosphate, Lignite, Chemicals/SMS & White cement grade Limestone and Gypsum. RSMML is not only the leader in Mining & Selling of Rock Phosphate, Gypsum across the country, but also global pioneer in technology in open cast mining and mineral beneficiation of Carbonate Rock Phosphate. Besides minerals, RSMML has also forayed into Energy Sector and has setup 106.3 MW installed capacity Wind Power Project at Jaisalmer, Rajasthan.

RSMML is inviting Expressions of Interest (EOI) extending opportunity to parties interested in entering into a long-term supply agreement with RSMML for the supply of high quality Limestone fines (5-30 mm) from Sanu mine no. 1 & 2 at District Jaisalmer, Rajasthan for captive consumption by cement plants only after re-handling of sub grade material {high quality fines (-30 mm size) dumped by backfilling and stored in mined out pit after the recovery of low silica high grade {(30-80 mm size) SMS grade Limestone } by excavation and screening. Sale or trading of Limestone procured from the company will not be allowed under any circumstances.

1. About lease, Location and Accessibility:

Sanu mine no. 1 & Sanu mine no. 2 are located near village Sonu in Jaisalmer district of Rajasthan located at a distance of 52 km & 55 km from Jaisalmer. Both mines are well connected with all season road of Border Road Organization (BRO). SONU village and Jaisalmer is also well connected with the Broad-Gauge line and SONU railway siding is 8-12 km from the Sanu mine no. 1 & 2.

Sanu mine no. 1(ML-27/96) granted under major mineral for mineral SMS/steel Grade Limestone for the period of 50 years w.e.f. 01.04.1997. Similarly, Sanu mine No.-2 (ML-01/97) is also granted under major mineral for mineral SMS grade & cement Grade Limestone for the period of 50 years w.e.f. 01.04.1997. At present, we are mining steel grade limestone for supply to steel plants of 30-80 mm size product. The EC capacity of the each mine is 1.25 million tonne per annum of SMS grade limestone and the mines is operating with full capacity. During process of production of steel grade limestone by sizing & screening of RoM Limestone, the undersized fines i.e. (-)

30 mm material is separately handled and supplied to sintering plants etc and unsold material is stored in mined out pit .

2. Geology of Jaisalmer Limestone:

The area is falling within the famous Khuiyala Limestone belt of Eocene in age. This deposit is known for the best available grade of Steel Grade Limestone (LD Grade) in the country. This area is being explored since 1976 by state DMG and the exploration work is still continuing. Total around 2200 million tonne reserve of SMS Grade Limestone has already been proved under G-2 level exploration by state DMG. The area is characterized by flat rolling dip with negligible overburden and is a part Thar Desert. Here the steel grade Limestone is directly exposed on the surface with the varying thickness from 3 to 6 Mtrs. This Limestone is underlain by Chalky Limestone of around 15 Mtrs. thickness and is the best suitable for manufacturing of the Cement.

The present status of back filled Limestone in the area is detailed here under, which is intended to be considered under this EOI-
